MS27 Mirror Sokkia Stereoscope

Stock #:1STSO-MS27

This exceptional Sokkia instrument has unmatched precision and ease of use for viewing and interpreting aerial photographs. Elevations can be seen with startling clarity in three dimensions and the instrument can be used for long periods of time without eye strain.

The distance between centres of the stereo pairs (optical path) is 27cm and the field of view is 18 x 23cm for view 23 x 23cm photographs. The BN3 3X binoculars, supplied as standard equipment, provide a bright distortion-free optical system. 8 x eyepieces (BN8A) are also available.

A convenient feature of the Sokkia MS27 Mirror Stereo is the ease of adjustment for varying interpupillary distance. There is no need to re-orientate photographs. This is an important asset when a number of people are viewing the same photographs.
