Availability: This item is brought in to order

With the Topcon MS-3 Mirror Stereoscope, you can observe aerial topography in three dimensions quickly and accurately. You can even see the height of small objects with great clarity. The highest degree of precision is maintained with the visual axis remaining absolutely parallel even over years of constant use. The instrument body and reflector frames are made in a single solid rugged casting, preventing misalignment. The instrument is compact and easily folded for field trips, with the right instrument leg adjustable for leveling operations. The MS-3 Mirror Stereoscope has a 3x Binocular Viewer, which is inclined at 45° for ease of viewing.

FEATURES:

- 3x binocular viewer
- Compact design
- Supplied in wooden carry case
